

Says

What have we heard them say?  
What can we imagine them saying?

Agriculture is the main source of income for major parts of our countries population

Data analysis help farmer to trace their product

Agriculture analysis is very important aspect to crop growing

Irrigation like drip irrigation can be helpfull

It is important to analysis based on how we can plant in less cost and more production

Analysis about the area and crops are essential and promoting rain fed crops in the areas were rain is low

It is essential to increase the yields in low cost

Creating awareness among the farmers about high yielding crops to increase the Indian economy

Organic cropping can also be promoted

It is the backbone of our country

I feel it is needfull to create awareness about the cropping and make India the 1st largest country in agriculture

Now a days many agricultural land are destroyed awareness should be created
